The real intelligence of a person is dragged out in the uninformed situations. Let us take the example of two friends Mohan and Shyam. Mohan was very good in his studies but Shyam is a slow boy she is not as much as bright as him but brighter than Mohan. Mohan is always busy in his books while Shyam is fond of adventure. Once during their school trip to a hilly area, there was a big natural calamity, so everyone in school and even the teacher feared about their life's but Shyam saved everyone with his adventurous experience. This also proves that intelligence is not scope of the bookish knowledge.

(iii) Intelligence is not a mindset, it is the power ~~of~~ that overcome and develop oneself even in the worst conditions. I am stand for this statement that "School examination do not test intelligence."

"Physical education and knowledge is better than the bookish knowledge." In the School examinations student have provided the specific topics and certain time for their learning and this exams are checking their progress ~~in~~ about this topics. Is this boosting and growing their intelligency?

Absolutely not, this is only creating the pressure upon the students about their progress and therefore they are studying forcefully in order to get good progress. ~~The teachers and parents are~~

Not only

but also all other peoples are judging the childrens intelligency on the basic of their marks. Many of the parents are forcing their childrens to study although, they have their interest in other fields.

Due to this forcement and underpressure many children not performed well in their examinations and have to suffer failures. This doesn't mean that the child is not intelligent but if he is putting his effort in other field. Many childrens only for the failure of themselves attempted ~~suicide~~ suicide.
